

We enable **aerospace** excellence.

CGI precision gearheads and custom assemblies are used in many aerospace applications because of their absolute reliability, precision and quality.

Advanced Products for Robotics and Automation

CGI Motion enables design excellence across a wide range of aerospace applications. We deliver electromechanical sub-assembly solutions for a wide range of aerospace and defense applications. We are your design and manufacturing partner helping to differentiate your product, machine or innovation. Our team of problem solving engineers and product managers can bring your application to market on-time and under budget. Whether it's an improvement on a current design or groundbreaking new designs, CGI has the know how and team to enable design excellence for your aerospace application. Connect with us today to explore what CGI Motion can do for you.
